

**ECI-Micro Retreat 2019**  
 February 21; 09:00 st  
 Biologikum, Hörsaalgebäude, Hörsaal B

09:00 – 09:25	Jan Schulze-Lührmann	“Small and large cell variants of <i>Coxiella burnetii</i> ”	AG Lührmann
09:25 – 09:50	Inaya Hayek	“Role of oxygen-level in control of <i>Coxiella burnetii</i> replication by macrophages”	AG Lührmann
09:50 – 10:15	Judith Schick	“Different mouse models to investigate the impact of helminth infections on mycobacterial infections”	AG Lang
<b>10:15 – 10:45</b>	<b>Coffee</b>		
10:45 – 11:10	Dulanthi Weerasekera	“Putative toxins of pathogenic corynebacteria”	AG Burkovski
11:10 – 11:35	Jens Möller	“Characterization of a new hazardous <i>Corynebacterium ulcerans</i> isolate”	AG Burkovski
11:35 – 12:00	Maximilian Gänsbauer	“The influence of Arginase 1 in IBD on the microbiome”	AG Mattner
12:00 – 12:25	Fabienne Irrgang	“Identification of host proteins targeted by the virulence factor LmPRL-1 of <i>Leishmania major</i> ”	AG Soulat
<b>12:25 – 13:45</b>	<b>Snacks</b>		
<b>13:45 – 14:45</b>	<b>Prof. Bernhard Hube</b>	<b>“From commensalism to pathogenicity: Interactions of <i>Candida albicans</i> with the host”</b>	<b>Department für Mikrobielle Pathogenitätsmechanismen, HKI, Jena</b>
14:45 – 15:10	Sebastian Schrüfer	“Interaction of eosinophils and <i>Aspergillus fumigatus</i> in the context of allergic bronchopulmonary aspergillosis (ABPA)”	AG Krappmann
15:10 – 15:35	Peter Plaumann	“To have or not to have: A dispensable chromosome enables host colonization in the pathosystem <i>Colletotrichum higginsianum</i> – <i>Arabidopsis thaliana</i> ”	AG Koch
<b>15:35 – 16:00</b>	<b>Coffee</b>		
16:00 – 16:25	Myriam Jeninga	“Functional analysis of the epigenetic regulator protein PfBDP1 during sexual differentiation in <i>Plasmodium falciparum</i> ”	AG Petter
16:25 – 16:50	Jennifer Quinn	“Interaction of PfBDP1 with putative mediator complex component PfMed24 in <i>Plasmodium falciparum</i> ”	AG Petter
17:00 – 17:30	<b>ECI-Meeting</b>
